

Metacamp

May 26th - June 9th

WEB3 | WELLNESS | WONDER

Playa Negra, Costa Rica

What & Why

MetaCamp is the home of a global tribe of regenerative thinkers, tinkers, and doers. As digitally native communities grow in scope and resources, they are increasingly looking for ways to instantiate in the physical world.

The desire to gather in the flesh will always remain a basic human need.

This is our 4th year gathering as a community from around the globe to tune into the higher frequency of what wants to be built in Web3, this event has become the Schelling point for leaders and teams to come together to advance their individual and shared goals.

MetaCamp gives rise to a holistic experience that blends the best of onchain tools like crypto and DAOs for coordination with health, wellness, and interpersonal connection. By hosting facilitated discussions, group exercises and excursions we deepen the relationships of all attendees and shed new light on our own roles in this ecosystem.

MetaCamp
